DEVICIE

Construction company achieves over $1.2 million ROI with full cloud migration and compliance wins

A leading construction company recently achieved full Essential 8 Maturity Level 1 compliance according to an external audit.

Key results

$1.2m ROI
annually

Full compliance
E8ML1

Zero-touch
onboarding for new devices

"This is an incredible effort given our size and the state of our E8L1 compliance 18 months ago. I wanted to thank Devicie for supporting us during the Intune migration. The team's ability to deliver has provided us with the bandwidth for the project's success."

Challenges

The company managed a complex IT environment with thousands of devices and 500+ applications. Making the move from System Center Configuration Manager (SCCM) to Intune was a daunting task, especially with the growing demand for flexible work and better user experiences. Their existing infrastructure was proving costly and inefficient, particularly with content deployment and device management needs for more than 60 remote worksites. Their on-premise system was struggling to keep up, leading to productivity losses and frustrated employees.

Solutions

Seamless migration to Intune:

Partnering with Devicie meant migrating 95% of the company's devices to Intune in record time. This was a critical step toward a fully cloud-native environment, and enabled the company to consolidate vendor costs, reduce reliance on on-premise systems, and achieve a $1.2M annual ROI.

An effectively managed dispersed workforce:

By leveraging Intune's delivery optimization and Autopilot, the company can now manage a distributed workforce from a central location, including zero-touch onboarding for new devices, even in remote areas with poor connectivity. This has been a game-changer, especially for their widespread contractor workforce.

Enhanced security and compliance:

Automated security configuration and optimization with Devicie kept devices secure and remotely managed. Employees stopped relying on VPNs for authentication or updates, which significantly increased productivity. With the time they got back, the company achieved full compliance with the Essential 8 Maturity Level 1.

Resource efficiency and automation:

Devicie's hyperautomation has allowed the IT team to focus on higher-value projects. Previously time-consuming tasks like device refreshes and rebuilds are now fully automated, and the team can easily handle custom changes like wallpaper updates with greater agility. Devicie ensures that devices stay compliant and secure with automated updates and ongoing maintenance.

Windows 11 upgrade with minimal overhead:

A smooth upgrade from Windows 10 to Windows 11 routed the majority of the work through Intune's advanced management features. This upgrade was completed with minimal overhead for the company, freeing up IT resources for more strategic initiatives.

Advanced reporting and visibility:

The Devicie platform enables real-time insights into the company's entire fleet, with visibility into applications, operating system versions, and patch statuses. This advanced reporting gives the IT team full control and confidence over the company's IT landscape.

Results

Partnering with Devicie has produced transformative results for the construction company, including:

- Achieving full compliance with Essential 8 Maturity Level 1

- Realizing a $1.2M ROI annually, thanks to productivity gains and vendor cost consolidation

- Migrating 95% of devices to Intune, significantly reducing reliance on SCCM

- Streamlining device management with automation, improving security and efficiency

- Gaining real-time visibility and control over their entire IT fleet from a single dashboard

- Freeing up IT resources to focus on strategic growth initiatives, accelerating the company's broader objectives

The Devicie difference

Devicie's automation capabilities have revolutionized the construction company's IT operations. Moving from a rigid and manual environment, Devicie has helped the team through a swift migration to Intune alongside cloud-native applications and enhanced security. Now, the company is empowered to operate more efficiently and securely. Partnering with Devicie has not only delivered a substantial financial return, but has also made space for the IT team to focus on projects that drive business growth.
