Device solutions sheet

Accelerated Microsoft Intune deployment, automatically maintained at scale

Key benefits

Rapid deployment

Achieve a best-in-class Intune instance tailored to your organizations needs in hours, not months

Resource efficiency

Automatically maintain your Intune instance without the manual workload, integrating RMM, MDM, and UEM functions to streamline and elevate endpoint management.

Enhanced security

Leverage and instantly deploy cutting-edge technologies consistently for superior protection

Assured compliance

Automation to support consistent adherence to policies with the reporting to prove it

Zero touch provisioning

Achieve no-touch device setup and make hardware refresh cycles a breeze

Copilot catalyst

Unlock Copilot, backed by stringent security and compliance

Effortless App Management

Automate application packaging and deployment to streamline operations and save valuable time, especially during large-scale rollouts.

Application & Patch Management

Automate updates and optimization across all devices, ensuring your infrastructure stays secure and efficient.

The Device difference

Instant uplift

Device's configuration engine quickly creates a best-in-class Intune instance tailored to your organization, saving time on setup.

Ideal state maintained automatically

Automates daily tasks, applying controls, updates, and patches to keep your system optimized. All of this without manual effort, consolidating and enhancing RMM, MDM, and UEM functions within Intune.

Alerts and remediation

Monitors system health independently and remediates issues instantly, sparing your team from constant oversight.

Streamlined compliance and visibility

Provides clear insights into endpoint health and compliance, simplifying reporting and reducing manual work.

Enhanced security posture

Strengthens M365 security with prebuilt policies and expert-driven configurations beyond default settings.

Independence from key resource churn

Automation ensures a stable M365 environment even during staffing changes, freeing your team for strategic work.

Outcome as a service

Device delivers seamless, zero-touch setup, continuous monitoring, and expert support to keep you in optimal modern management.

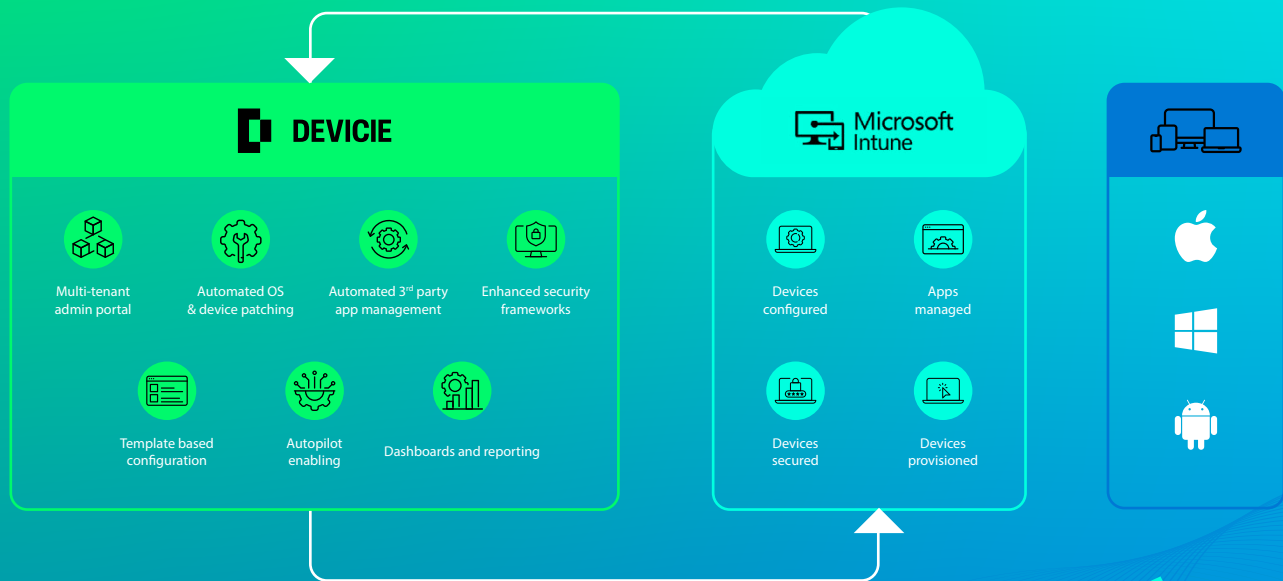

Endpoint lifecycle

Supports every device stage, ensuring security, compliance, and optimization from onboarding to offboarding.

One solution for all devices

Automatically maintain your Intune instance across all devices, including Mac, eliminating the need for product-specific MDM tools and reducing multi-vendor complexity and costs.

Unlocking productivity, security & compliance through automation

In today's work-from-anywhere world, balancing productivity with stringent security requirements is challenging. Devicie automates modern device management for M365, building and deploying a best-in-class Intune instance tailored to each organization. With hyperautomation, Devicie enables seamless, no-touch management for updates, policies, and controls. This enhances productivity, maintains compliance, and fortifies security, all without the need for manual intervention.

Accelerating Value and Reducing Costs

Transitioning to a state of modern device management is essential but challenging. Devicie allows you to bypass this challenge whilst gaining a competitive advantage in the process. Organizations using Devicie gain potential savings of up to \$2 million annually through streamlined operations, consolidation, and increased productivity.

Streamlining success

From months to hours, Devicie transforms the journey to modern management. We create a unique Intune instance through our generative configuration engine and roll it out globally across an organization's devices. This ensures an optimal state of modern management.

*"The challenge for us was keeping devices healthy and up to date; not because we don't have the skills, but because we don't have the time. **It would have taken us at least 12 months to do ourselves what Devicie did in less than one.**"*

*"**Devicie has been transformational** and after the company-wide rollout onboarding new employees and setting up their devices went from taking several days to just 30 minutes and their **experience was improved dramatically.**"*

Achieve modern management with Devicie

Devicie is a MACC-eligible Microsoft Partner. We work with IT teams of all sizes from companies all over the world to enable people to work efficiently while ensuring device security is hardened and compliance is attainable. We'd love to share more about how Devicie can help your organization.
